Omnibus tests are a kind of statistical test.They test whether the explained variance in a set of data is significantly greater than the unexplained variance, overall.One example is the F-test in the analysis of variance.There can be legitimate significant effects within a model even if the omnibus test is not significant.

Omnibus test - Wikipedia

Burial or interment is the ritual act of placing a dead person or animal, sometimes with objects, into the ground. This is accomplished by excavating a pit or trench, placing the deceased and objects in it, and

covering it over. Humans have been burying their dead for at least 100,000 years.
