### **Actual Costing with the SAP Material Ledger**

A blockchain, originally block chain, is a growing list of records, called blocks, which are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a merkle tree root hash).. By design, a blockchain is resistant to modification of the data. It is "an open, distributed ledger that can record ...

The primary bookkeeping record in single-entry bookkeeping is the cash book, which is similar to a checking account (UK: cheque account, current account) register, but allocates the income and expenses to various income and expense accounts. Separate account records are maintained for petty cash, accounts payable and receivable, and other relevant transactions such as inventory and travel expenses.
