Helping students develop a deeper understanding of how cells work. The Problems Book helps students appreciate the ways in which experiments and simple calculations can lead to an understanding of how cells work. This is accomplished by introducing the experimental foundation of cell and molecular biology.

The Problems Book: for Molecular Biology of the Cell

Language acquisition is the process by which humans acquire the capacity to perceive and comprehend language, as well as to produce and use words and sentences to communicate. Language acquisition is one of the quintessential human traits, because non-humans do not communicate by using language. Language acquisition usually refers to first-language acquisition, which studies infants ...

Working memory is a cognitive system with a limited capacity that is responsible for temporarily holding information available for processing. Working memory is important for reasoning and the guidance of decision-making and behavior. Working memory is often used synonymously with short-term memory, but

some theorists consider the two forms of memory distinct, assuming that working memory ...
