In 1856, Rudolf Clausius, referring to closed systems, in which transfers of matter do not occur, defined the second fundamental theorem (the second law of thermodynamics) in the mechanical theory of heat (thermodynamics): "if two transformations which, without necessitating any other permanent change, can mutually replace one another, be called equivalent, then the generations of the quantity ...

Sensible heat is heat exchanged by a body or thermodynamic system in which the exchange of heat changes the temperature of the body or system, and some macroscopic variables of the body or system, but leaves unchanged certain other macroscopic variables of the body or system, such as volume or pressure.. Usage

Software Availability. All software and a manual (Heat Transfer Tools) consisting of about 100 pages of documentation were originally published by McGraw-Hill in July 2001. In addition to the software, the CD-Rom includes about 60 additional pages in "pdf" files detailing the numerical modeling used "behind the scenes," making these materials very appropriate for use at the graduate level as ...

The Engine ORC Consortium 2018 Workshop is an open forum for technology sharing and learning about mobile and stationary ORC systems up to 100 kW output power. Building on the success of the 2017 conference held in Detroit, Michigan, the 5th annual Workshop will be hosted in Lyon, France between September 26th and 28th, 2018.

Polymer electrolyte membrane (PEM) fuel cells, which convert the chemical energy stored in hydrogen fuel directly and efficiently to electrical energy with water as the only byproduct, have the potential to reduce our energy use, pollutant emissions, and dependence on fossil fuels.
