Economic growth is the increase in the inflation-adjusted market value of the goods and services produced by an economy over time. It is conventionally measured as the percent rate of increase in real gross domestic product, or real GDP.. Growth is usually calculated in real terms - i.e., inflation-adjusted terms " to eliminate the distorting effect of inflation on the price of goods produced.

Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or ...

281. Difference between Funds flow and Cash flow statement: A Cash flow statement is concerned only with the change in cash position while a funds flow analysis is concerned with change in working capital position between two balance sheet dates. A cash flow statement is merely a record of cash receipts and disbursements. While studying the short-term solvency of a business one is interested ...
