Chemistry is essential in modern society. The electronics at the heart of your mobile phone, the fibre optics which bring you high-speed broadband, most of the fabrics and dyes in the clothes you wear – none of these would exist without a thorough understanding of the chemical properties of substances. You can complete an optional work placement year as part of this degree course at no extra ...

Thermal runaway occurs in situations where an increase in temperature changes the conditions in a way that causes a further increase in temperature, often leading to a destructive result. It is a kind of uncontrolled positive feedback.. In other words, "thermal runaway" describes a process which is accelerated by increased temperature, in turn releasing energy that further increases temperature.
