Distillation is the process of separating the components or substances from a liquid mixture by using selective boiling and condensation. Distillation may result in essentially complete separation (nearly pure components), or it may be a partial separation that increases the concentration of selected components in the mixture.

Hoy en día, los profesionales de la química en todas sus áreas, requieren de sólidos conocimientos de momentum, calor y procesos de transferencia de masa, así como de procesos de separación. Procesos de transporte y principios de procesos de separación, cuarta edición, ofrece un tratamiento unificado y comprensible de dichos temas y muestra lo más reciente en cuanto a métodos y ...
