Solving Exponential and Logarithmic Equations 1. To solve an exponential equation, first isolate the exponential expression, then take the logarithm of both sides of the equation and solve for the variable. 2. To solve a logarithmic equation, first isolate the logarithmic expression, then exponentiate both sides of the equation and solve for ...

Functions - Exponential Functions Objective: Solve exponential equations by finding a common base. As our study of algebra gets more advanced we begin to study more involved functions. One pair of inverse functions we will look at are exponential functions and logarithmic functions. Here we will look at exponential functions and then we
